Career Objective

A cognitive CCE student with a well-rounded background in Computer Science. Currently seeking an internship that can help enhance and refine my skills in the Software and Development fields.

Education

Notre Dame University Louaize (2020 – Present)

Bachelors of Engineering | Computer and Communication Engineering

- Dean's List: Held throughout all semesters
- Expected Graduation: End of May 2025

Achievements & Certificates

- Completed UI/UX Training Under Simplilearn & Forwardmena
- Completed Udemy's The Complete C++ Developer Course
- Completed Udemy's 100 Days Of Code: The Complete Python Pro Bootcamp For 2022

Work Experience

Intern | *inmind.ai* (July 2024 - Aug 2024)

- Built an ecommerce website using Angular integrating features from both its old and new versions such as Signals, Standalone components, Modules, and Observables.
- Built a simple API with multiple GET, POST, and PUT end-points using .NET Core.
- Built a simple ToDo website using Angular for the frontend, .NET Core for the backend, and PostgreSQL as the database. The project was then dockerized and networks were created to link them using external and internal ports.
- Got introduced to many important concepts in frontend-development such as Service Workers, Micro-frontends, PWAs and Monorepos.

Intern | IT Department At HDF (June 2023 - Sept 2023)

- Worked with the networks team on dealing with facility and staff problems.
- Became familiar with the systems and software used at HDF. (VMWare, Jira, Active Directory, Firewall)
- Worked with the support team on on-call duty to solve any IT related problems faced by staff at the facility.

Freelance:

Front-End Web. Developer

Currently working on a tutoring website using React and Django.
